

Park/Pickup a Call

Call parking allows you to "park" a phone call, placing it on hold to be answered on a softphone or any other phone in the office. The caller is put on hold while you switch phones.

Park a Call

Assigned Parking Spot

Dial *37 + parking spot # (any number of digits, but it cannot start with 0).

Example: To park a call in spot 1, blind transfer the call to *371.

To park a call in spot 15, blind transfer the call to *3715.

Transfer #37

Note: If you attempt to park a call in an occupied parking spot, the two calls will be merged together creating a two-way call between the parked calls.

Page Recipient

Dial *116 and announce a call is parked on 37 and the number you assigned, and hang up.

Pick Up a Parked Call

Dial *37 + parking spot number assigned.

Transfer Calls

Warm (Attended) Transfer

Places the current call on hold and initiates a call with the transfer destination to confirm whether the call is wanted or not. The two calls are then merged together.

1. While on an active call, press the **Trans** softkey*.
2. Dial the internal extension or external number.
3. Speak with the destination party.
4. Hang up.

Note: If you hang up before the call rings, the transfer will fail and the call will be disconnected.

Blind Transfer

Routes the call to a third party, the original call is ended, and no confirmation is made to determine whether the transferred call is answered or if the number is busy.

1. While on an active call, press the Trans softkey*.
2. Press the Blind softkey*.
3. Dial the internal extension or external number.

Tip: To transfer a call directly to voicemail, dial 0 + extension.

Hold

1. Press hold button.
2. Press the Line key to retrieve the call.

Tip: If multiple calls are on hold on a single line key, use the arrow keys to switch between the calls then press the Resume softkey to retrieve the desired call. If more than two calls are on hold on a single key, an indication will appear on the display, for example "2/3" shows that this is the second call out of three calls.*

Voicemail Access

1. Dial *99.
2. Dial your password (default 0000).

3-Way Calls

1. While on an active call, press the Conf softkey*.
2. Dial the internal extension or external number to add to the conference.
3. Wait for the second party to answer.
Note: It is best practice to consult with the second party before adding them to a 3-way call.
4. Press the **Conf** softkey* again.
